

Citation of Syed Ijaz Ahmed Bokhari

(The Best Poster Award for Students)

Syed Ijaz Ahmed Bokhari is a PhD Indigenous scholar under the supervision of Prof. Dr. Muhammad Aslam Baig (HI, SI, TI) at the Atomic and Molecular Laser Spectroscopy Laboratory, Quaid-e-Azam University Islamabad. He is a life time member of the Pakistan Physical Society. His PhD research work is on “The Photoionization Cross-section and Oscillator Strength Measurements of the excited states of Inert Gases”. He is involved in the emission as well as photo-absorption experimental studies of the atomic structure. Recently he has published a paper in a very reputed American Journal Physical Review-A on the photoionization cross section measurements of the excited states of neon. In the last two years he has contributed in Two Oral and Two Poster Presentations in the National and International Conferences. He participated in the poster competition at University of Gujarat Conference 2011 organized by the Pakistan Physical Society. His topic was “**The Photoionization cross- section measurements of the excited states of Xenon**”. His poster has been awarded the first Position and a certificate of “Young Scientist Award”
