

Citation of Mr Waqas Akram

(The Best Poster Award for Students)

Mr. Waqas Akram has ability to leverage skills and capabilities to participate in research oriented activities. He is a self-motivated M. Phil researcher working under the supervision of Dr. Abdul Majid at University of Gujrat Hafiz Hayat campus. He has just got enrolled himself in the innovative field of material science and took start with the study of density functional theory of various materials. He is involved in the DFT study of FeCo, GdCoN and CeCo₂. In the recent year he has participated in one national conference and presented a poster in the poster competition at University of Gujrat in Conference on contemporary physics 2011 organized by the Pakistan Physical Society. His topic of poster presentation was **“DFT study of electronic and structural properties of CeCo₂”**. His poster has been awarded with first Position and a certificate of **“Young Scientist Award”**.
